# Commander's Observations

Families and Friends of the Steel Spike Battalion,

Hello again to everyone and I hope this issue finds you all enjoying the first days of summer. Memorial Day held a special significance to our Team this year with the recent loss of SPC Jacob Barton and I wish to extend my condolences to both his Family and to all of our Soldiers and Families who have been affected by the loss of a service-member during their lives.

LTC Matthew Zajac  
Battalion Commander  
46th ECB (H)

Our Soldiers continue to excel in the demanding climate and persistent threats of the Baghdad area. As many of you are aware, the agreement between the governments of the United States and Iraq require combat forces to withdraw from Iraqi cities by 01 July, and in response our construction missions are further and further out of the city as we prepare life support and force protection for expanding bases. We are meeting this challenge, and as you have seen in many of the media releases, our Soldiers' efforts are praised daily by the Coalition leadership. I expect we will continue swinging hammers, pushing dirt, and turning wrenches up until our last day here.

In a few days we will deploy our concrete team to Afghanistan, and the combined efforts of the Battalion, companies, and the Soldiers of the concrete team have prepared them for their mission. SSG Roach will lead this 15-Soldier team as they support the requirements of the forces surging into Afghanistan. I am confident that he and his NCOs will exhibit the same professionalism and technical skill that has made them successful here in Iraq. This team remains on the same redeployment timeline as the battalion, and will rejoin us at Fort Polk in early September.

In closing, I ask us all to remain vigilant against becoming complacent as we complete the remaining months of our tour. Treat each day as a new day, continue to support one another, and seek constantly to keep each other safe. Our Team both here and at home has done a tremendous job in the many past months – let's continue so until we find ourselves all back together.

SPIKE 6

## The Concrete Team receives their Iraqi Campaign service awards. The concrete team deploying to Afghanistan is composed of the following Soldiers:

SGT Seth Willson & SGT Kellen Barns

SSG Wesley Roach (Team Leader), SPC Daniel Parker, SSG Dennis Bartlett, SPC Christopher Bortell, SGT Dontai Smiley, PFC Eric Vanstrander, SGT Nicholas Gibbs, PFC Pete Cervantes, SGT Maurice Polite, PV2 Christopher Ruffin, SGT Jeremy Royer, PV2 Joshua Heinel & SPC Matthew Boyle.

## CSM's View

Another month down and a few left to go, and the increase in the temperature is keeping pace with increase in the missions the Battalion is conducting. The Battalion has been very busy supporting US forces as they move out of the cities. The work being done ranges from renovations to completely new construction and lots of earthwork. The mechanics have been working some long hours to keep the equipment rolling.

The Battalion sponsored an Engineer call, which started with a soccer game against our Iraqi partners. The Iraqis faced a much improved Steel Spike team but we were still no match for them once again. The day ended with a Mexican themed dinner and some outstanding home cooked specialties by our talented crew from the 277<sup>th</sup>. The night was made complete as non alcoholic margaritas were served from a Gator built tropical bar, and the Salsa band provided music after dinner. The few hours it lasted was a great break from the daily grind and was a huge success due to the support and effort the companies put into it.

We only have a few more months to get Spike 6 to shave his head, so feel free and even have the "little Spikes" email him some encouragement. I will be on my R&R when all the email fills his inbox and hopefully he will have forgotten by the time I get back.

CSM Frank Thibodeau  
BN CSM  
46th ECB (H)

Happy Birthday Spike 7! CSM Thibodeau thanks guests at his BBQ for bday presents and the good food.

Take Care and Thank You for all your Support,

SPIKE 7

## Chaplain's/ PA's Corner

### Don't Quit!

"For which one of you, when he wants to build a tower, does not first sit down and calculate the cost to see if he has enough to complete it?" (Luke 14:28)

A man joined a monastery that had a rule of being able to speak only two words every 10 years. After the first ten years he said, "Bad food." After ten more years he said, "Hard bed." Finally, after thirty years he said, "I quit!" The head priest looked at him and replied, "Good, because all you ever do is complain anyway!"

At some point and on some level, you and your family counted the cost of serving in the United States Army. The cost of military service can be emotionally, spiritually, and physically demanding. I encourage you to keep on keeping on. We aren't done yet, but having counted the cost – remain committed to your decision to honorably serve until your time is done.

CPT Jerry Wagner  
BN Chaplain

### Tension Headaches

This is the most common type of headache and is caused by stress. It is located at the base of the skull/top of the neck.

#### Here are some things that help:

- If possible, stop what you are doing and try to relax.
- Massage shoulders, neck, jaw and scalp.
- Take a hot bath or shower. Lie down.
- Place a warm or cold cloth, whichever feels better, over the aching area.

Biofeedback training or counseling for chronic headaches is available. For jobs requiring long hours of sitting, be sure to get up and move around at least once an hour. OTC Tylenol, ibuprofen, or aspirin are acceptable medications to relieve the pain of these headaches. The most important factor is to limit the sources of stress.

CPT Troy Bidez  
BN Physician's Assistant

# HSC "SPARTANS"

I would like to introduce myself to some and get reacquainted with others. I am CPT Kimberly Cowlin, a native of Childersburg, Alabama. I have been in the Battalion for 15 months, serving as the Commander for Task Force Gold Spike serving the Sadr City area with our engineer assets. I am looking forward to working with the FRG leaders, as well as getting to know the Family members. FRG is near and dear to my heart. I honestly believe if we take care of the Family members, it allows the Soldiers' heart to be at ease over here.

As the new Commander of HSC, I am excited to lead the SPARTAN Team. I have watched the Soldiers of HSC grow over the past 15 months, and I must say they are some of the finest Soldiers I have ever worked with. HSC Soldiers are the strength of this Battalion, and the Company that holds everything together.

CPT Kimberly Cowlin  
HSC Commander

We are on the downhill side of this deployment, but the SPARTAN Team is still pushing harder than ever to accomplish missions. We had SGT Brian Lee and SGT Jason Fuoss who are part of the EQ Platoon reenlist this month.

We had several Soldiers to receive awards for outstanding performance, along with four promotions. Whether it comes to outstanding accomplishments on mission, in the class room, or on the PT field:

## HSC SPARTANS lead the way!

**JOINT CONCRETE TRAINING WITH IRAQI ARMY**

**Story & Photos by:  
2LT Mayerovitch**

Sgt. James Jones, concrete squad leader, 46th Engineer Combat Battalion (Heavy), a native of Columbia, S.C., and his squad spent the morning of 15 May training the 6th Iraqi Army Engineers on how to conduct concrete missions and use the concrete module. The concrete module is a mobile concrete factory, and the training gave the IA engineers the necessary skills to conduct concrete construction missions and make road repairs.

The Iraqi Soldiers were quick to step up when the opportunity arose to get hands-on experience. They took turns operating the controls, getting on top of the concrete module to push the sand and gravel, and smoothing out the concrete in the holes.

"The Iraqis were really motivated to learn how we do things," stated Pvt. Ryan Doak, concrete and asphalt specialist, 46th ECB (H), from Eugene, Ore. "After the first couple holes they were pretty much running the show."

Once the initial training was completed, the Equipment Platoon of Headquarters and Support Company, 46th ECB (H), worked alongside the Iraqi Army Engineers to set twenty-four bases for solar light poles. They worked in the blazing heat, and managed to finish them all in one day.

After completing the training and solar light mission, the Iraqi Soldiers invited the Army Engineers to lunch to enjoy fellowship with their new comrades. The Iraqi engineers prepared a curry chicken and rice dish that was a new experience for many of the American Soldiers.

"It was nice to experience the local culture," stated Pvt. Doak. "I was impressed by their hospitality."

# ALPHA "GATORS"

**"When everything seems to be coming your way at a furious pace, you're probably counter-flowing down ROUTE TAMPA."**  
*paraphrased from SPIKE 6 radio traffic*

May! It's here, and we have the rising temperatures to prove it. In my opinion, spending two summers in Iraq is a fair trade-off for not missing two, consecutive football seasons. No strangers to the heat, the Gators made the most of their environment as usual. Last month, the Soldiers continued to set the mark high for general engineering support throughout Multi-National Division Baghdad. First platoon completed massive renovations to a multi-story, high rise building. Meanwhile, second platoon built a guard shack, a kitchen shelter, and finished a gym/living area building. All of these vertical construction projects occurred in separate locations throughout Baghdad, but they were all in support of 3-82<sup>nd</sup> Airborne. Second platoon also partnered with the 23<sup>rd</sup> Iraqi Army Brigade to construct and emplace wooden safety platforms in guard towers at a Joint Security Station.

Steadily maintaining at least three missions at one time, the Earthmovers kept a blistering pace with multiple route sanitation missions to clean up main routes and deny the enemy locations to hide roadside bombs. They also completed five combined missions with four different Iraqi Army Engineer partner units including the 6<sup>th</sup> Iraqi Army Engineers, the 9<sup>th</sup> Iraqi Army Engineers, the 11<sup>th</sup> Iraqi Army Engineers, and the 17<sup>th</sup> Iraqi Army Engineers. Working with the Iraqis Engineers, known as Jundi, has been both challenging and rewarding and our Soldiers have pioneered the best practices to make the training effective.

This month marked a change in Gator leadership as 1LT Jordon Davis transitioned out of the Company Executive Officer position and 1LT Michael Cirillo stepped up from platoon leader to fill the role. 1LT Davis has been a brilliant performer since 2007, and we wish him well as his moves on to his next challenge in the Steel Spike battalion...staff!

We're still collecting shoes to donate to our Iraqi counterparts. Please send new or slightly used athletic shoes or boots to:

Shoes for Soldiers  
 A/46<sup>th</sup> ECB (H)  
 APO AE 09344

Please donate if you can. We've already begun to receive some donations and are excited to be able to help out our Iraqi partners.

I continue to be impressed and, in some cases, astounded by the sheer determination to get the job done by the Gator Warriors. I hope you are all doing well back home and beginning to see the light at the end of the tunnel. Just make sure the light isn't oncoming traffic!

**GATOR STRONG! GATOR PROUD!**

Greetings once again from "across the pond,"

The 15<sup>th</sup> of May is fast approaching and that day will be a bitter sweet one for myself because on that day 1SG Jackson will become the Senior Non-commissioned Officer for Team Gator. 1SG Jackson will take over the duties and responsibilities that have been entrusted to me for the past two years as the Gator First Sergeant. As it has been said before, and I cannot say it enough, thanks for being great Americans and it has been a true honor and privilege to have been associated with the Gator Family. The Gators' cannot be left in more capable hands than with CPT Landreth and 1SG Jackson. I know 1SG Jackson will be as approachable as I was. CPT Landreth as the commander with 1SG Jackson will be an awesome command team that every company will be jealous of. A great command team for great Soldiers and their awesome Families.

It was a privilege to have had the opportunity to see the following Soldiers deservingly promoted on the first of May:

Daniel Almquist and Marquis Ingram were promoted to the Rank of Private First Class. Ricardo Garciamora, Marcos Sepulveda, Christopher Balcom, Jacob Wade, and Ryan Wigle were promoted to the rank of Specialist. Hopefully these Soldiers will pass on their experiences by staying on the Army team and becoming our future First Sergeants.

Please stay safe and I wish everyone the best of luck. I will be remaining in the battalion as the battalion operations NCOIC so I am looking forward to seeing everyone in a couple of months. Until then, this is Gator Seven, out .

CPT Reyn Landreth  
 A CO Commander

1SG Tracy Jackson  
 A CO First Sergeant

Sgt. Mark Jordan, instructs a team of 23rd Iraqi Army Engineer Regiment Soldiers on how to outfit their concrete guard towers with wooden safety platforms.

Sgt. Mark Jordan, team leader, from San Antonio, climbs the ladders to the top of newly renovated guard tower.

**GATOR FIESTA!!!**

# BRAVO "BEAST"

Hello BEAST Families and friends!

I hope this message finds you well and in good spirits. I would like to first say happy belated Mother's Day. We are all excited, and amazed at how fast the time is flying here. Some say the time flies when you're having fun. The month of April has been nothing less than fun and very busy for Bravo Co. On April 05, 2009, we participated in the SFC Paul R. Smith Run. He is a Fallen Engineer who received the Medal of Honor for his heroic actions on 4 April 2003. The seven mile run built cohesion amongst the Engineer Corp. and was a great way to reflect on fellow engineers who have made the ultimate sacrifice for us. We were also provided the opportunity to meet two Medal of Honor recipients: LTC (retired) Robert L. Howard and SGM (retired) Gary Lee Littrell. As we enter the fourth quarter in our deployment we have began making movements to redeploy at the end of summer. Many awards have been passing through the chain of command like an assembly line.

This month we have continued to provide integrated and synchronized construction efforts to several maneuver commanders as they push out of the city to new location. This month we have simultaneously executed over 10 lines of effort at various locations in and around Baghdad. Our construction famished BEAST have continued devour any construction project or mission place in front of them.

CPT Christopher Beal  
B CO Commander

The platoons have constructed an enormous ricochet proof range, helicopter landing zone, vehicle entry control point, and 10 wooden buildings; increasing the tactical work and living space in Baghdad by over 18,000 square feet. Our electrical crews have startlingly installed over 15 miles of electrical wiring, hundreds of lights, AC units, and outlets all in one month. Needless to say we have all been busy planning, resourcing, managing, and executing essential projects in order to improve the living and working condition here.

This month one of the focus points for the company leadership was focused on the importance of not becoming complacent and loosing focus. We must all remember that our Soldiers have an important mission in front of them and need your support 24/7. As our Family Readiness Group continues to blossom and I encourage each of you to take part in the meetings, and fun events.

1SG Gregory Williams  
B CO First Sergeant

Feel free to visit our company website listed below for more pictures and monthly information.

*"Rock Steady and Lean Forward"*

*BEAST 6 & BEAST 7 OUT!*

Highland Park, Mich. native, Spc. Issiah White prepares to install a double top plate to lock in the walls of his B-Hut at Combat Outpost Carver, located in the southeastern outskirts of Baghdad May 4.

Spc. Chance Bailey from Russellville, Ark, nails together a floor system frame to prepare it for sheathing. The 46th Eng. Bn. is building 30 B-Huts, a dining facility extension and a food preparation area at Combat Outpost Carver, located in the southeastern outskirts of Baghdad, May 4.

RIGHT: Spc. Todd Buckmeier from Wasilla, Alaska, moves purlines into place before he secures them to the B-Hut truss system May 4. Buckmeier along with his fellow future noncommissioned officer specialists are in the lead in the building of 30 B-Huts, a dining facility extension and food prep area at Combat Outpost Carver, located in the southeastern outskirts of Baghdad.

# Bravo "Beasts" at the Cinco de Mayo SAPPER CALL!

# 277th EN CO "DIRT DEVILS"

Hello Dirt Devil Families,

A lot of things have happened in the last month here in Baghdad. We uncovered a buried T-72 tank during a project, several Soldiers were promoted, there were children born, celebrated "Cinco de Mayo," and dozens of other things of note. Unfortunately, all of these things were overshadowed by the loss of one of our own.

SPC Barton was a good soldier and a member of the 277<sup>th</sup> family, his loss is a tremendous blow to the company. I wish to send my sincere condolences to his family and friends back home for their loss. We had a touching memorial to SPC Barton and the 277<sup>th</sup> family has grieved together here in theater. I hope that the letters, tribute, and videos sent home help reflect how beloved SPC

Barton was and ease the pain of his loss with the knowledge that he was happy and successful in what he was doing here.

All the Dirt Devils are doing well here. Thank you to all the FRG and family members who support us every day, it is a tremendous help and makes it possible to do what Soldiers do.

Have great day and remember to be thankful for the blessings in your lives. Give my kids a hug for me if you see them.

Dirt Devil 6 out.

CPT Gordon Robbins  
277th EN CO Commander

Hello to all Families and Friends,

It is a great honor and a privilege to be the Senior Non Commissioned Officer of the 277<sup>th</sup> Engineer Company, The Dirt Devils! I just want to start off by saying how proud of our Soldiers I am. You should be very proud of what they are accomplishing. They have done so many projects on the FOB as well as off the FOB and have made a name for themselves.

Many Companies/Battalions already know the name of the 277<sup>th</sup> Dirt Devils and all of this has been made possible by the direct reflection our Warriors have made on each unit that they have worked with. The soldiers have done some tough missions and lived in some tough conditions, but every time I see them on site they are all smiles.

On behalf of the entire Chain of Command, I want to thank you all for your continued prayers. The numerous projects that the company is completing are making life a lot more tolerable for the other maneuver elements spread across Baghdad. Once again, the 277<sup>th</sup> Soldiers are making a great name for themselves and driving right along.

Be very proud of your Soldiers for they are proud Engineers. I could not have asked for a better unit to be the First Sergeant of, so make sure you spread the word to everyone about your Soldiers.

As most Families already know, Soldiers are now coming home on leave, enjoy your time with them and be patient with them. A Deployment changes the Soldier and the Families. Not all of the information will be put out due to Operational Security, but the FRG will be in contact with the Company Commander and me.

May God bless each and every one of you as well as the 277<sup>th</sup> Engineer Company!

Dirt Devil 7 Out!

1SG Antwann Rhodes  
277th EN CO First  
Sergeant

**The "Dirt Devils" give Engineers in Baghdad a Taste of Texas during the Cinco de Mayo Celebration, 9 May at Camp Liberty!**

Left: Heavy Equipment Operators move debris at Sather Air Base.

Right: Prepping a site with a grader.

Bottom Right: Support Platoon prepares to construct sniper screen.

277th Engineer Company Soldiers, 1st Lt. Stuart Redus (left) and Staff Sgt. Ismael Gaona, both from San Antonio, Texas, are pictured with a T-72 tank discovered at Sather Air Base in Baghdad. Redus and Gaona are the officer-in-charge and non-commissioned officer-in-charge of the expansion mission at Sather Air Base in Baghdad. The tank was discovered while the engineers were conducting an airfield expansion mission.

## SOLDIER IN FOCUS

It takes great skill to be a good mechanic. It takes patience, attention to detail, and the desire to continually increase knowledge to be a great mechanic.

Medford, Wis. native, Spc. Robert Barber, a mechanic for the 46th Engineer Combat Battalion (Heavy), 225th Eng. Brigade, always gets the job done right the first time. The mechanics in his section seek him out when they have questions - knowing he has the answers. His willingness to share his extensive knowledge of keeping equipment and vehicles mission-ready, knowledge which extends beyond his current rank, is the reason he was chosen for “Soldier in Focus.”
